# SUPPORT FOR STUDENTS WITH FASD

STATEWIDE SERVICES CENTRE

# Aims

To share information about the work of the Department of Education in creating professional learning and resources to support students with Fetal Alcohol Spectrum Disorder (FASD).

# Resource development

The project has been conceptualised and developed by harnessing the expertise of:

- consultants across the Department of Education
- school leaders and teachers across education regions.

The project is informed by state, national and international research.

# Building knowledge and understanding

Resources for school leaders and teachers will include professional learning that focuses on:

- meeting the diverse learning needs of students with FASD; and
- explores classroom strategies that focus on improving the educational and personal achievements of their students.

# Effective teaching and learning

Resources for school leaders and teachers will include examples of teaching and learning in Western Australian public schools that illustrate a strength based approach to working with students with FASD.
